

Instructions for installing StatSoft Statistics using the license of the Faculty of Economics in Osijek

Note: Since the license is at Faculty of Economics in Osijek, it is allowed to use only for employees and students of the Faculty of Economics in Osijek because the website registers who has made the installation on their computer. The Faculty of Economics in Osijek can use the license only for its employees and students.

Installation procedure:

1. Select to download the file named **Statistica_14.0.0_zip**

The downloaded ZIP file must be unpacked on its local disk using 7zip or WinRar or another, and run the **Statistica.exe (blue icon) file** in the newly created folder.

2. Proceed with the installation and enter the Serial number, Product key and Installation code data (in the downloaded file Statistica_14.0.0_zip, open the document titled **serial.txt**, which contains information about serial number, product key and installation code).

3. When the user registration window appears, enter your first and last name, address, phone number (you can use 031 224 400) and e-mail address on the efos.hr server. NEVER USE YOUR E- MAIL ADDRESS, which does not have an extension "@ efos.hr", because only the address to "@ efos.hr" can activate the license. If you do not have your email address on the efos server, enter the address: **stati@efos.hr**.

4. A message will appear that you need to connect your computer to the Internet. Click OK if you are already connected to the Internet, and if you are not, connect to the Internet.

5. When you click the "Next" button, the email address you specified will be sent a message to activate the license. Before you click the "Continue" button, you should check out the mailbox at that address if your account has received a License Sticker message.

If you use stati@efos.hr, connect to: <http://www.efos.hr>, then click on **"CARNET EMAIL"**

- username and password are in file **serial.txt**

If you use your personal e-mail address on efos, then enter your user account information and efos CARnet email.

If the message arrived for you in your mailbox (if you use the address stati@efos.hr, you must see the date and time of the message so that you do not open the message that has arrived for another user), open it, click the link found in the message, and if you get a message that the license is successfully activated, go back to the Statistica installation window and click on the "Continue" button.

After that, continue with the installation process by clicking the "Install" button and proceed further.

6. In the window asking whether you want to install the Typical or Custom version, choose **Custom** and continue to accept everything listed.

7. Go to the end of the installation process and start the Statistics tool. When prompted, the "Welcome" window will appear, which closes with Close. The Statistics tool is now ready for use.
